Seal lid tightly after use

Winter Paw Pet Friendly Ice Melt® is an ice melting alternative when concerned with the welfare of your pawed friends. Its low toxicity and salt-free formula makes it safer to use around the home and workplace where pets may be present. Performs effectively down to -15°F

**WARNING: HARMFUL IF SWALLOWED
KEEP OUT OF REACH OF CHILDREN
NOT FOR FOOD OR DRUG USE**

FIRST AID: IF IN EYES: Flush eyes with water for at least 15 minutes. Remove contact lenses if present and easy to do. Seek medical attention if irritation persists.

IF ON SKIN: Flush skin with water. Seek medical attention if irritation develops or persists.

IF SWALLOWED: Seek medical attention. Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person.

ADVISORY STATEMENT ON CONCRETE

Granular deicers will not chemically attack concrete or cause harm to properly mixed (air-entrained), poured, finished, and dried concrete. However, natural freeze/thaw cycles, as well as freeze/thaw cycles caused by deicing material, may cause damage to poor quality concrete. Deicers should not be used on precast concrete products, brick, exposed aggregate or on any questionable-quality concrete. DO NOT USE ON CONCRETE LESS THAN 1 YEAR OLD.

STORAGE

Seal container tightly after each use and store upright in a cool, dry area inaccessible to children and domestic animals. Note: During periods of high humidity or if the product comes in contact with moisture, the contents of the jug may begin to activate and become difficult to spread.

WARRANTY STATEMENT

Seller makes no warranty, expressed or implied, as to the results of the use of this product. Buyer assumes all risk of loss or damage resulting in the use, re-use, handling, and storing of this product whether in accordance with label instructions or not.

DIRECTIONS FOR USE:

1. Apply at a rate of 2-4 oz. (1/4-1/2 cup) per square yard by sprinkling evenly or by using a spreader
2. Remove any resulting slush and water prior to refreezing
3. Reapply as needed

USE PRECAUTIONS

Over application may cause surface flaking or scaling and increase the occurrence of freeze/thaw cycles. It is recommended to remove all slush and water resulting from the deicing process to decrease the frequency of freeze/thaw cycles. This product may cause damage to plants, vegetation, and lawns when it is placed directly on, or very near the vegetation itself. Vegetation damage is also more likely when deicing products are used excessively.
